## CURIOSITY CRUISER: MUSEUM ON THE MOVE

Introducing the Curiosity Cruiser, your friendly neighborhood museum on wheels! The Denver Museum of Nature & Science is hitting the road in a pop-up vehicle, stocked inside and out with fun activities for some on-the-go wonder for all ages.

Bring the Curiosity Cruiser to your community. We'll come to your next block party, festival, or office event! The Cruiser is staffed by professional Museum educators who know how to feed minds and imaginations. We'll set up the trailer and facilitate the activities while you enjoy the day. There's no end to the wows when you're enjoying some brain food.

### PLAN YOUR EXPERIENCE BY CHOOSING ONE OF THESE THEMES:

#### SPICY: REVEALED

dares you to get to know the science behind spicy flavors and foods, and our curious relationship with them.

**FLAVOROLOGY** is an interactive adventure in the five tastes—bitter, spicy, umami, sweet, and sour—mixing them with our other senses to uncover surprising things about yourself and the world around you.

**MOOD & FOOD** invites you and your friends to question those gut feelings, trick your senses, alter your moods, taste your way through questions, and find out if you are a moody foodie!
